How to Use Service Parts List

RANK

Handling RANK characters (parts that are handled in a special manner during parts operation, such as replacement)

Character	Under Warranty	Out of Warranty
R	Must be	Repairable
	returned.	1 (chairable
	Must be	
O	returned.	Not repairable
ا	(We use for	
	analysis.)	
	Must NOT be	
	returned.	
Т	(Consumable	Not repairable
l	part. Not	Not repairable
	applicable for	
	free of charge.)	
without	Must Not be	Niet were einelele
R, Q, T	returned.	Not repairable

Export regulation-applicable character(Parts without the following character are not controlled by Export regulation.)

Character	Significance
	Parts applicable to export
I	regulations.

 Fault RANK characters (which provide reference for determining the recommended stock quantity)

All parts are assigned either A through E.

Character	Significance
	Consumable parts or parts
Α	that will be replaced at short
	intervals.
	Parts that may become faulty
В	accidentally and have a relatively
	high failure rate.
	Parts that have a sufficiently long
С	MTBF, but are expected to have
	a relatively high failure rate.
	Parts that have a sufficiently
D	long MTBF, but are expected to
	become faulty.
	Parts that are necessary for fault
	analysis, or parts that may be
E	needed in case of unexpected
	accidents such as man-induced
	damage.

<The RANK guide>

The Fault RANK characters, Handling RANK characters, and Export regulation-applicable character are assigned in that order.
Thus, at least one character or up to three characters are assigned in the RANK column.

REF.NO.

REF. NO. is a parts number indicated in the Service Parts Exploded Views. For parts having different functions, they are clearly distinguished in the REMARKS and SERIAL NUMBER columns.

■ PART NUMBER

PART NUMBER is a code number that is unique to each part. An alphabetic letter at the right-most position of the code number has the following meaning.

For hardware

The alphabet denotes the version number of a part. If parts have different version numbers, they are upward-compatible.

○ For software

The alphabet denotes a difference in the specifications. Parts differing in the suffix are not compatible with each other. Although the version is indicated by a number, it is omitted.

■ PART NAME

PART NAME represents a general name of a part.

QTY.

QTY. denotes the quantity of parts used in each unit.

○ A parts with -S assigned to the end of the quantity represents a small part that is shipped in packs of 50. (Even if such a part is ordered in quantity of 1, a pack containing 50 pieces of that part is supplied.)

■ REMARKS

The REMARKS column indicates a unique name of a part or its relevant information of note.

■ SERIAL NUMBER

The units may contain different parts depending on their shipment control number. SERIAL NUMBER indicates the shipment control number to which the relevant parts are applicable. If the SERIAL NUMBER column is blank, the parts are applicable to all the relevant units. The shipment control number is represented by lower five digits of eight-digit number indicated on the rating indication label.

REFER TO

The "REFER TO" column shows the reference sections concerning the registered parts whose removal/installation procedures are set forth in the "Check, Replacement, and Adjustment" volume (MC).

As regards the parts whose information is set forth in the "Check, Replacement, and Adjustment" volume (MC), the associated information about screws, E-rings, and the like is not presented within parts illustrations. To confirm the information about screws, E-rings, and the like, refer to the "Check, Replacement, and Adjustment" volume (MC).

Quantities of recommended spare parts

It is recommended as a rough guide to hold in stock a certain quantity of parts according to the rank (A, B, C, D, E) assigned to the parts, as follows. For periodically replaced parts, hold them in stock separately. Adjust the stock quantity of service parts depending on the number of working units (N).

Quantity used in a single system: Q

 \bigcirc N = 1

Rank $A = 1 + Q \times 0.3$

Rank $C = 1 + Q \times 0.05$

Rank D = $1 + Q \times 0.02$

 \bigcirc 2 \leq N \leq 10

Rank $A = 2 + N \times Q \times 0.3$

Rank $C = 2 + N \times Q \times 0.05$

Rank D = $1 + N \times Q \times 0.02$

 \bigcirc 11 \leq N \leq 300

Rank $A = 3 + N \times Q \times 0.3$

Rank C = $3 + N \times Q \times 0.05$

Rank D = $2 + N \times Q \times 0.02$

■ Precautions to be Observed When Returning Parts in Need of Repair

When returning a component in need of repair, pack it in the same manner as for the supplied substitute, using the substitute packing materials.

The use of different packing materials or packing methods may incur damage to packed component during transit.
